YOU ASKED FOR IT... SO WE'RE GIVING IT TO YA...

WHAT THE %#\$* is?

PARSNIPS

Although available year-round in most markets, the prime season for parsnips is fall and winter. These roots can grow to an immense size, but the truly large ones are undesirable due to a woody, bitter core. Select parsnips that are small to medium in size, 5 to 10 inches in length, with firm flesh and no soft spots. The colour should be even as dark spots can indicate decay or freeze-burn. Store unwashed parsnips in a cool dark place, just as you would carrots. Wrapped in a paper towel and placed in a plastic bag in the vegetable drawer of your refrigerator, they should last up to 2 weeks,

if not longer. Cooked parsnips may be refrigerated and used within 3 days. To avoid mush parsnips, add them to soups and stews near the end of the cooking time.
