WE KNOW YOU HAVE QUESTIONS....

YOU ASKED FOR IT... SO WE'RE GIVING IT TO YA...

WHAT THE %#\$* is?

GREEN ONIONS/SCALLIONS

Green onions or scallions are really immature onions. Scallions are harvested while their tops are still green and before the bulb takes its full shape. Green onions can be eaten raw or cooked and have a milder flavour than their onion relative. Purchase only green crisp tops and white bottoms. In general, the more slender bottoms will have a sweeter taste. Scallions wilt within a couple of days, so it's best to use them immediately. However, if you must store them, refrigerate them in a tightly closed plastic bag for up to one week. Rinse the scallions thoroughly as dirt may be lodged

between the leaves. Trim any wilted parts and the tip of the white root. The entire scallion can be chopped or sliced and added to any recipe for added flavour.
